	<p>This TA was an outstanding TA. I have learned more from him than my actual professor. The class lecture was garbage, the professor make a lot of mistakes on his lectures notes and rushes through a crime scene he calls power point notes, but with the TA his notes are beautiful and straight forward and easy to read.</p> <p>I will highly recommend this TA for Calculus 3 he is amazing and goes above and beyond for his students not just the ones who show interest.</p> <p>Discussed each chapter section in great detail and is more than willing to review with students individually. Highly recommend this TA.</p> <p>My TA, Hossien Sahebame, was the best TA I have ever experienced at UH. He was extremely proficient in his teaching methods and was always available for office hours. He was by far the best TA I have ever been taught from.</p> <p>Hossien Sahebame was an amazing TA, he has a great teaching method and is clear to understand. He respects the student's questions, always thanking and complimenting student's questions when they are asked. He was always available for office hours and made an effort to push student's to showing up to his office for extra assistance. He is the best TA I have ever experienced, so much so I would show up to his class and not go to my professor Pan's classes because my professor was confusing while my TA was great.</p>
17	<p>I think everything was totally fine.</p> <p>I think everything was totally fine.</p> <p>Very great at explaining problems step by step. Helped with many questions I had regarding the lectures.</p> <p>My TA was very helpful and was able to simplify difficult concepts so that I could better understand them.</p> <p>The TA is what made this class viable. He explained concepts clearly and simplified them to make them very digestible. I would take another course with this TA if it were offered and believe him to be a model for what TA's should be.</p> <p>The best Teaching Assistant I have had by far. Very clear in what is being taught and very easy to understand. Always available for help and always explains and helps with any question we have.</p> <p>N/A</p>
